Education

2018–2021 **Bachelor of Computer Science (November 2021)**, *Kampala International University*, Uganda.
Second Class upper Honours

Relevant Experience

Work

2018–2019 **Internship**, Humuza, Uganda.
Designed and built numerous clients' websites during my internship with HUMUZA LTD. During my time there, I got important experience with task management and programming knowledge (HTML,CSS and JAVASCRIPT).

Detailed achievements:
○ GitHub
○ Gained experience on different programming language (HTML,CSS and JAVASCRIPT)
○ Learned about the different system development methodology
○ Used MS-Project for task management during system development
○ Learned to manage work overload
○ Improved on my inter-personal communication skills and teamwork

Personal Projects

2019–2021 **Personal Portfolio**, WEB DEVELOPMENT, Front-End.
I worked on my own portfolio website, which is a static website that I created utilizing multiple technologies (HTML, CSS, and JAVASCRIPT). During this project, I learnt a lot about JavaScript.

Detailed goal achieved:
○ Worked with (Github)
○ I learned more about DOM manipulation in JavaScript and responsive design with CSS.

2019–2020 **PayPal Clone Ui**, WEB DEVELOPMENT, Front-End.
I designed and developed the PayPal website in order to gain more knowledge. Throughout this project, I had obstacles that I overcame in order to gain more knowledge.

Detailed goal achieved:
○ CSS grid/flexbox
○ UI/UX design using figma
○ HTML proper syntax

2020–2021	**Transcript verification system**, WEB DEVELOPMENT, Full-stack. As final year project, we designed and built a transcript verification system along-side a classmate. We employed a variety of technologies during this project (HTML,CSS,PHP,SQL,Bootstrap). This is a system with a stunning user interface and a powerful back end. Detailed goal achieved: ○ Worked with version control (Github) ○ System development methodology based on agile principles was employed ○ Used MS-Project for task management during system development ○ Bootstrap ○ Worked with SQL and PHP for the system's back-end.

Developer Skills

Front-end skills	HTML, CSS, JavaScript
UI/UX design skills	Figma, Adobe Photoshop
Programming languages	Python, Java, Php
Back-end	SQL
FrameWorks	React, Bootstrap, Tailwind
Tools	Github, MS-Project, Jira

Languages

Mothertongue	**Kanuri, Hausa**	
Proficient	**English**	
Basic	**Turkish, Luganda**	*Basic words and phrases only*

Interests

- Chess
- Football
- Cooking
- Reading
